Mobile: 7386260082

Education

- National Institute of Technology, Silchar

India

Bachelor of Technology - Computer Science and Engineering; GPA: 8.8

2019 - 2023

Skills

- Programming:

Advanced - Python, SQL, PL/SQL, Object-Oriented Programming

- Software Architecture:

Cloud Solutions, Application Design, System Enhancement

- Relation Databases:

RDS, Redshift, Postgres, Database Management

- Development Tools:

Amazon Glue, EMR, Software Debugging, Code Optimization

- Software Applications:

Amazon QuickSight, Operating Systems, Network Applications

- Technical Expertise:

Software Development, Cloud Architecture, Troubleshooting, System Integration

Experience

- ORGANIZATION: Amazon Web Services

ROLE: Consultant Data Analytics

August 2023 - Present

- Software Architecture: Designed scalable and performant software solutions tailored to customers needs, ensuring high availability, robust functionality, and cost-effectiveness.
- Application Development: Providing expert guidance to customers on implementing cloud solutions, including application design, database integration, and software enhancement.
- Troubleshooting and Debugging: Identifying and resolving challenges related to platform and application performance, implementing systematic debugging approaches to ensure seamless operation.

- Organization: Mastercard

Role: Software Developer Intern

May 2022 - July 2022

- Developed applications at scale following software architecture best practices.

- Debugged existing systems and suggested architectural improvements.
- Landed PPO for my work during the internship.

- **ORGANISATION: GEEKSFORGEEKS AND SCALER**

Role: Content Writer

Freelancing

- Created publicly available articles and coding examples on software development concepts, algorithms, and programming techniques.
- List of published articles: <https://Rishiraj-Kalita-Articles-Link>

Projects

- **CLOUDERA TO EMR MIGRATION**

Task: Executed a comprehensive software development project migrating from Cloudera to Amazon EMR, designing and developing data processing applications using Spark, implementing thorough debugging protocols, and enhancing system architecture for approximately 5000 jobs.

Technologies: Software Development, PySpark, EMR, S3, IAM

- **MIGRATING FROM INFORMATICA TO PYSPARK - Amazon GLUE**

Task: Architected and developed efficient software solutions to replace Informatica pipelines, enhancing application performance and reliability for processing and transforming data in Amazon S3 to be stored in Amazon Redshift.

Technologies: Software Architecture, Cloud Solutions, MWAA(Airflow), Redshift.

- **MIGRATING FROM SISENSE To Business Intelligent Service - Amazon QUICKSIGHT**

Task: Designed and developed software applications to improve the efficiency and consistency of dashboards, troubleshooting complex integration issues and architecting robust solutions for data modeling based on business requirements.

Technologies: Software Development, Application Design, Cloud Tools, PySpark.

Certifications

-
- AWS Certified Data Engineer
 - AWS Certified Machine Learning Specialist
 - AWS Certified Solutions Architect
 - AWS Certified AI Practitioner
 - Solved more than 1500 algorithmic questions on various competitive coding platforms
