Education

- National Institute of Technology, Silchar

India

Bachelor of Technology - Computer Science and Engineering; GPA: 8.8

2019 - 2023

Skills

- Programming:

Advanced - Python, SQL, PL/SQL, Object-Oriented Programming

- Web Development:

RESTful APIs, Backend Development

- Relation Databases:

PostgreSQL, RDS, Redshift

- Cloud Systems:

AWS Services, System Integration, Version Control (Git)

- Data Engineering:

ETL Pipelines, Data Warehouses, Apache Iceberg

- Data Science and AI/ML:

Amazon Bedrock, Langchain, ML Algorithms, Deep Learning

Experience

- ORGANIZATION: Amazon Web Services

ROLE: Consultant Data Analytics

August 2023 - Present

- Architecting Scalable Backend Solutions: Designed highly available, secure, and performant data platforms tailored to customer needs, implementing RESTful APIs for efficient data access.
- Strategic Technical Consulting: Providing expert guidance to customers on end-to-end data solutions, including database optimization, authentication mechanisms, and third-party service integration.
- Troubleshooting and Optimization: Identifying and resolving challenges related to platform performance, ensuring efficient database queries and optimizing server-side processes.

- Organization: Mastercard

Role: Software Developer Intern

May 2022 - July 2022

- Developed backend components for applications at scale, collaborating with cross-functional teams.

- Implemented RESTful APIs and integrated third-party services following object-oriented design principles.
- Landed PPO for my work during the internship.

- **ORGANISATION: GEEKSFORGEEKS AND SCALER**

Role: Content Writer

Freelancing

- Created publicly available articles and problems on Graphs, Trie, Dynamic Programming, SegmentTrees, and other algorithmic concepts for backend development.
- List of published articles: <https://Rishiraj-Kalita-Articles-Link>

Projects

- **CLOUDERA TO EMR MIGRATION**

Task: Executed a comprehensive Cloudera to Amazon EMR migration, transferring on-premises Hive tables data using Sparkjobs, performing data validation and security implementation, successfully migrating approximately 5000 jobs to Amazon EMR platform.

Technologies: Hive, PySpark, EMR, S3, IAM, Git

- **MIGRATING FROM INFORMATICA TO PYSPARK - Amazon GLUE**

Task: Improved the efficiency and consistency of data pipelines originally built on Informatica for processing and transforming data in Amazon S3, to be stored in Amazon Redshift. Designed RESTful APIs for seamless data access.

Technologies: Amazon S3, Glue, MWAA(Airflow), Redshift, Python, Object-Oriented Programming.

- **MIGRATING FROM SISENSE To Business Intelligent Service - Amazon QUICKSIGHT**

Task: Enhanced dashboard functionality by migrating from Sisense to Amazon Quicksight. Modelled data for reporting based on different Business Logic using ETL jobs and integrated third-party services for comprehensive data visualization.

Technologies: Amazon Quicksight, Amazon S3, Glue, PySpark, PostgreSQL.

Certifications

-
- AWS Certified Data Engineer
 - AWS Certified Machine Learning Specialist
 - AWS Certified Solutions Architect
 - AWS Certified AI Practitioner
 - Solved more than 1500 algorithmic questions on various competitive coding platforms
