Education

- National Institute of Technology, Silchar

India

Bachelor of Technology - Computer Science and Engineering; GPA: 8.8

2019 - 2023

Skills

- Programming :

Advanced - Python, Spark, SQL, PL/SQL

- Data Engineering :

HDFS, Hive, Data Lakes, Data Warehouses, Apache Iceberg, ETL Pipelines

- Relation Databases :

RDS, Redshift, Postgres

- Big Data Tools :

Amazon Glue, EMR, Data Migration Tools

- Data Visualization:

Amazon Quicksight, Dashboard Creation, Business Intelligence

- Data Science and AI/ML :

Amazon Bedrock, Langchain, Prompt Engineering, ML Algorithms, Deep Learning

Experience

- ORGANIZATION: Amazon Web Services

ROLE : Consultant Data Analytics

August 2023 - Present

Architecting Data Engineering Solutions: Design scalable and performant data platforms tailored to customers needs, ensuring high availability, reliable data processing workflows, and cost-effectiveness.

Strategic Data Engineering Consulting: Providing expert guidance to customers on end-to-end data engineering processes in AWS, including data ingestion, storage optimization, transformation strategies, analysis, and validation.

Troubleshooting and Optimizing: Identifying and resolving data pipeline challenges related to platform and application performance, ensuring seamless operation and efficiency of enterprise-level data flows.

- Organization : Mastercard

Role : Software Developer Intern

May 2022 - July 2022

Worked to understand Application Development at Scale with focus on data handling processes.

Landed PPO for my work during the internship.

• ORGANISATION : GEEKSFORGEEKS AND SCALER

Role : Content Writer

Freelancing

Created publicly available articles and problems on Graphs, Trie, Dynamic Programming, SegmentTrees, and data structure algorithms.

List of published articles : <https://Rishiraj-Kalita-Articles-Link>

Projects

CLOUDERA TO EMR MIGRATION

Task:

Executed a comprehensive Cloudera to Amazon EMR migration, transferring on-premises Hive tables data using Sparkjobs, performing data validation and performance enhancements, successfully migrating approximately 5000

jobs to Amazon EMR platform.

Technologies:

Hive, PySpark, EMR, S3, IAM

MIGRATING FROM INFORMATICA TO PYSPARK - Amazon GLUE

Task: Improved the efficiency and consistency of data engineering pipelines originally built on Informatica for processing and

transforming data in Amazon S3, to be stored in Amazon Redshift. Implemented robust data quality checks and optimization techniques.

Technologies:

Amazon S3, Glue, MWAA(Airflow), Redshift.

MIGRATING FROM SISENSE To Business Intelligent Service - Amazon QUICKSIGHT

Task:

Improved the efficiency and consistency of the dashboards built on Sisense to Amazon Quicksight. Modelled data

for reporting based on different Business Logic using ETL jobs and engineered data transformation workflows.

Technologies:

Amazon Quicksight, Amazon S3, Glue, Pyspark.

Certifications

AWS Certified Data Engineer

AWS Certified Machine Learning Specialist

AWS Certified Solutions Architect

AWS Certified AI Practitioner

Solved more than 1500 algorithmic questions on various competitive coding platforms
