Education

- National Institute of Technology, Silchar

India

Bachelor of Technology - Computer Science and Engineering; GPA: 8.8

2019 - 2023

Skills

- Programming:

Advanced - Python, Spark, SQL, PL/SQL, Shell scripting

- Data Engineering:

ETL/ELT Pipelines, Data Validation, Data Transformation, Data Integration

- Databases:

PostgreSQL, RDS, Redshift, NoSQL concepts

- Big Data:

HDFS, Hive, Data Lakes, Data Warehouses, Apache Iceberg, PySpark

- Cloud DevOps:

Git, Linux, AWS services (S3, IAM, Glue, EMR)

- Data Visualization:

Amazon Quicksight, Dashboard Development

- Data Science and AI/ML:

Amazon Bedrock, Langchain, Pandas, scikit-learn, Prompt Engineering

Experience

- ORGANIZATION: Amazon Web Services

ROLE: Consultant Data Analytics

August 2023 - Present

Architecting Data Solutions: Design scalable and performant ETL/ELT data pipelines tailored to customer needs, ensuring data accuracy, consistency, and completeness.

Strategic Cloud Consulting: Providing expert guidance to customers on the complete data journey in AWS, including data ingestion, storage, transformation, analysis, and validation using Python and SQL.

Troubleshooting and Optimizing: Identifying and resolving challenges related to platform and application performance, implementing data warehousing/lakehouse principles and ensuring efficient data processing.

- Organization: Mastercard

Role: Software Developer Intern

May 2022 - July 2022

Collaborated with cross-functional teams to understand Application Development at Scale using Python and SQL databases.

Developed and maintained data processing components following software engineering best practices.

Landed PPO for my work during the internship.

- **ORGANISATION: GEEKSFORGEEKS AND SCALER**

Role: Content Writer

Freelancing

Created technically accurate, well-documented articles and problems on Graphs, Trie, Dynamic Programming, Segment Trees, and others.

Developed clear documentation demonstrating strong written communication skills for technical concepts.

Projects

CLOUDERA TO EMR MIGRATION

Task:

Executed a comprehensive Cloudera to Amazon EMR migration, transferring on-premises Hive tables data using PySpark jobs, performing data validation and transformation, successfully migrating approximately 5000

jobs to Amazon EMR platform while ensuring data integrity.

Technologies:

Hive, PySpark, EMR, S3, IAM, Linux, Shell scripting

MIGRATING FROM INFORMATICA TO PYSPARK - Amazon GLUE

Task: Improved the efficiency and consistency of ETL/ELT data pipelines originally built on Informatica for processing and

transforming data in Amazon S3, to be stored in Amazon Redshift, implementing data warehousing principles.

Technologies:

Amazon S3, Glue, MWAA(Airflow), Redshift, Python, PySpark, SQL

MIGRATING FROM SISENSE To Business Intelligent Service - Amazon QUICKSIGHT

Task:

Designed and implemented data integration flows for dashboard migration from Sisense to Amazon Quicksight. Modelled data

for reporting based on different Business Logic using ETL jobs, ensuring data accuracy and completeness.

Technologies:

Amazon Quicksight, Amazon S3, Glue, PySpark, Python, Data Validation techniques

Certifications

-
- AWS Certified Data Engineer

- AWS Certified Machine Learning Specialist
- AWS Certified Solutions Architect
- AWS Certified AI Practitioner
- Solved more than 1500 algorithmic questions on various competitive coding platforms
