Education

- National Institute of Technology, Silchar

India

Bachelor of Technology - Computer Science and Engineering; GPA: 8.8

2019 - 2023

Skills

- Programming :

Advanced - Python, SQL, PL/SQL, API Development

- Backend Development :

Express, Server-side Applications, Microservices Architecture

- Relation Databases :

RDS, Redshift, Postgres, SQL Databases

- NoSQL Databases :

DynamoDB, MongoDB

- Cloud Computing :

AWS, Data Services, Containerization

- Data Visualization:

Amazon Quicksight

- Testing Development :

Unit Testing, API Testing, Test-Driven Development

Experience

- ORGANIZATION: Amazon Web Services

ROLE : Consultant Data Analytics

August 2023 - Present

Architecting Microservice Solutions: Designed scalable and performant API-based platforms, balancing functionality and cost-effectiveness in cloud environments.

Strategic Cloud Consulting: Provided expert guidance to customers on implementing server-side applications in AWS, including API development, database integration, and monitoring.

Troubleshooting and Optimizing: Identified and resolved challenges related to multi-tenant platforms and application performance, ensuring seamless operation across SQL and NoSQL databases.

- Organization : Mastercard

Role : Software Developer Intern

May 2022 - July 2022

Collaborated with cross-functional teams to understand Application Development at Scale in fintech environment.

Developed and maintained API endpoints for payment processing systems using server-side technologies.

Landed PPO for my work during the internship.

- ORGANISATION : GEEKSFORGEEKS AND SCALER

Role : Content Writer

Freelancing

Created publicly available articles and problems on Graphs, Trie, Dynamic Programming, SegmentTrees, and others.

Developed technical documentation on API development and server-side architecture for educational purposes.

Projects

CLOUDERA TO EMR MIGRATION

Task:

Executed a comprehensive Cloudera to Amazon EMR migration, transferring on-premises Hive tables data using Sparkjobs, performing data validation and performance enhancements, successfully migrating approximately 5000

jobs to Amazon EMR platform.

Technologies:

Hive, PySpark, EMR, S3, IAM

MICROSERVICES API ARCHITECTURE - Amazon GLUE

Task: Improved the efficiency and consistency of data pipelines by implementing microservices architecture, developing RESTful APIs for processing and transforming data in Amazon S3, with storage in Amazon Redshift.

Technologies:

Amazon S3, Glue, MWAA(Airflow), Redshift, Express.

MIGRATING FROM SISENSE To Business Intelligent Service - Amazon QUICKSIGHT

Task:

Implemented monitoring and logging solutions while improving the efficiency of dashboards built on Sisense to Amazon Quicksight. Modelled data for reporting based on different Business Logic using server-side ETL processes.

Technologies:

Amazon Quicksight, Amazon S3, Glue, Prometheus for monitoring.

Certifications

AWS Certified Data Engineer

AWS Certified Machine Learning Specialist

AWS Certified Solutions Architect

AWS Certified AI Practitioner

Solved more than 1500 algorithmic questions on various competitive coding platforms
